

BE GREEN

Arvat Florin Gabriel

Our country has beautiful places where people can relax and have fun. We love spending time in the countryside because nature brings joy and peaceful moments for all of us. But, we the human beings, do not know how to protect the environment. And we destroy what we love the most: OUR HOME. The solution is to collect all the garbage and put it in recycle bins, to clear the rivers and let the animals live in a clean environment.

The tree cannot breathe because of the trash that people have thrown away

This is how a river should be: beautiful and crystal clear with no trash in it

Life is beautiful when we do not destroy it by throwing our stuff in the animals' houses
