

Land pollution, Romania's biggest issue

Tons of garbage are thrown in landfills or in the streets and forgotten about. What is it doing to us you ask? Slowly killing us and the beauty of the places that we love! In Romania this is an astronomical issue! The garbage is just left in the streets, and the worst part is that the government and the people have stopped caring. At this rate we might not have any beauty left in our beloved country! The solution? Just start caring! Governments and also citizens should really involve themselves and fix this problem. What should you do? Throw your litter in the garbage! That's it!

This is the transformation of the big city, frequently visited by tourists of Sibiu, Romania.
