ISTITUTO COMPRENSIVO

LOMBARDO RADICE

CALTANISSETTA

INTRODUCTION

During these months our students keep on attending the Hobbies Club at school with great interest and enthusiasm, they had lots of fun! You could often meet them in the hallways talking about their activities, or in the Art Laboratory creating their beautiful works, or playing instruments in the afternoon according to the theme established for this purpose...

It's so amazing and nice to see our teenagers involved in something different from using Social networks and enjoying it, or using technological devices to do something useful and with an educational aim.

Good work, guys!

For this reason in our
school students are
attending a course on
cybersecurity to develop
in them an aware use of
Internet

SPORTS AND DANCE CLUB

It was the boys' main game before the advent of road traffic, when the streets and squares of towns and suburbs were all a natural gym, you could play hide-and-seek, poisoned ball, with FUNICELLA, without any danger.

Today's kids no longer know how to skip FUNICELLA, which is why it needs to be taught in schools.

Students create simple choreographies on various musical bases, free body and with small tools. The dance is joy and fun but also movement and as such produces numerous beneficial effects in the body: it promotes harmonious muscular development, makes movements graceful, teaches the sense of rhythm, increases creativity, promotes socialization.

MUSIC CLUB

The movie released on the Queen a few months ago inspired us for the making of a medley on some of their famous songs: We will Rock You, Innuendo, The show must go on.

The boys are therefore engaged in the study of the single parts and weekly we meet to concert the various passages.

The organic - being a rock score - is varied and includes (in addition to guitar, violin, flute and piano), electronic keyboards, bass and electric guitars, drums and sin
