

Breathe Together: A Sustainable Future in Nature's Rhythm

Breathe Together: A Sustainable Future in Nature's Rhythm aims to raise students' awareness about climate change, environmental protection, and sustainable living. Through collaborative activities, students will explore how human actions affect the balance of nature and how small individual steps can create a big impact for our planet.

In this project, partners from different countries will share ideas, research local environmental issues, and create artistic and digital products to promote eco-friendly habits. By working in harmony with nature's rhythm, students will learn to value our planet's resources and develop a sense of responsibility towards a greener and healthier future. Key topics include recycling, renewable energy, biodiversity, water conservation, and the importance of collective action for climate sustainability.

Breathe Together: A Sustainable Future in Nature's Rhythm

Activitățile desfășurate în luna **ianuarie**:

- "From Nature to Art": elevii au adunat frunze și crengi uscate și au făcut opere de artă din ele;
- "Nature's Rhythm Calendar": a trebuit realizat un calendar pentru anul 2026 cu poze din natură pentru fiecare lună.

Activitățile desfășurate în luna **februarie**:

- "Seed Balls": elevii au făcut mingi din pământ, nisip și semințe de flori ce vor fi plantate în curtea școlii;
- "My Nature Instruments": din materiale reciclabile s-au făcut instrumente muzicale.
