

RETHINK REUSE RECREATE

ReThink – ReUse – ReCreate is a 5-month project that aims to increase students' awareness of recycling, sustainability and environmental responsibility. Within the scope of the project, students are expected to experience the processes of rethinking waste (ReThink), reusing materials (ReUse) and creatively transforming them into new products (ReCreate). The project brings together students from primary, middle and high school levels and offers collaborative activities through Web 2.0 tools such as Padlet, Wordwall, Quizizz, Google Sites, Canva, Tinkercad and StoryMap. At the end of the project, the common products created by the students, the recycling manifesto and the digital stories will be shared, thereby contributing to the promotion of sustainable living habits within schools and the local community.

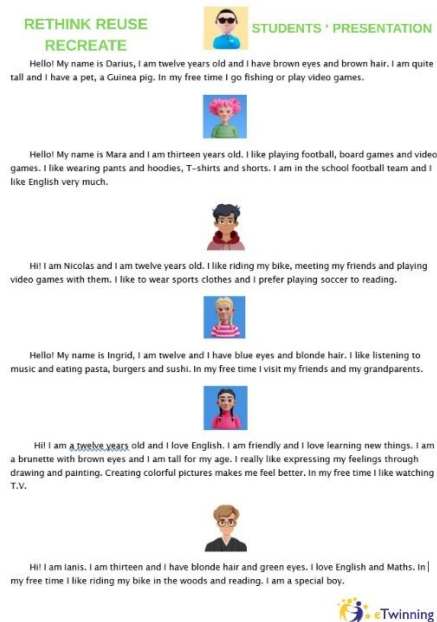

ReThink ReUse ReCreate

Activități desfășurate în luna **ianuarie**:

- Prezentarea profesorilor, a elevilor, realizare Logo și Poster

Hello! My name is Georgiana Andrei, I live in Pitesti, a town from Romania and I've been teaching English for 24 years and I can say it is a joy for me to work with children and spend time with them. Sometimes it is a hard job, but the results are better. I love spending time walking, hiking, listening to music and reading. I think it is important to do what we like, to feel relaxed and enjoy life with both good and bad parts.

Activități realizate în luna februarie:

- Recycle Today, Save Tomorrow: elevii au scris un eseu despre reciclare;

- Hands on Recycling, Mini Workshop: au fost realizate obiecte din materiale reciclabile: s-a realizat o barcă, o vază cu flori.
